

Print test

Print this page before your first kit: one minute to make sure everything comes out at the right size.

This line is exactly 10 cm long (10 cm)

4 inches (4 inches)

5 × 5 cm

- 1 Measure the line with a ruler. Exactly 10 cm (about 4 inches)? Perfect, print your kits with the same settings.
- 2 Shorter? Your printer is shrinking the page. In the print window, choose “Actual size” or “100%” instead of “Fit to page”.
- 3 Is the dotted frame cut off on one side? Your printer has wide margins: no problem, the important parts of the kits stay away from the edges.
